Replacement for IRD Returns
and Printed Reports

High-Volume Transaction
Delivery

Low Operating Expenses

Fast Data Delivery and
Efficient Operations

Encryption Ready for
Reduced Fraud & Data Theft
Exposure

Innovation for Commercial
Fee-Based Services

CSC's CheckVision® e-Data Delivery application suite provides the latest vehicles for secure and flexible delivery of check images, statements, reports, lockbox and associated payment data to your retail banking and corporate customers. With CSC's CD-ROM Plus, banks send customers' statements, reports, retail and wholesale lockbox data, and images burned onto a CD-ROM or DVD.

The suite includes CheckVision CD-ROM Plus, Lockbox CD-ROM and Virtual CD-ROM. Supporting modules include CheckVision Scheduler and Encryption, and the system also requires CheckVision Image Framework, CSC's proven high-volume architecture. Images can come from CheckVision Archive or third-party industry archives.

Improve Customer Service with CD-ROM/DVD Distribution

Most competitive banking organizations offer commercial customers a CD-ROM cash management delivery vehicle to replace bulky paper reports and check returns. Your organization probably already does this today, but is your institution happy with its CD-ROM product? Are you meeting your service level agreements cost-effectively, and do you offer a competitive product for your marketplace?

Above all, is your customer's data secure? Does your CD-ROM product offer industry-leading encryption that uniquely encrypts all customer sensitive data on a per-customer basis? Does it offer just-in-time decryption, whereby the customer can keep the data encrypted on their side, so that data protection not only extends from the bank to the customer, but stays secure at the customer's site?

CD-ROM Plus, part of CSC's CheckVision e-Data Delivery, is cost-effective, secure, delivery software for cash management via CD-ROMs and DVDs. It offers exceptional quality and operational efficiency that in turn empowers your organization to improve customer service levels. CD-ROM Plus automates the process from data retrieval, to labeling and shipping, reducing effort and increasing accuracy. It comes with standard security and integrates with CSC's Encryption software for strong yet easy-to-use protection of sensitive customer data.

CD-ROM Plus Business Benefits

CSC continues to invest in software extensions to ensure that banks using CheckVision e-Data Delivery applications have access to

technology that will help them stay ahead of their competition. Lifetime data encryption support on CD-ROM Plus is just one of the many examples of how CSC has pushed the envelope. CD-ROM Plus also:

- Provides proven cash management information delivery
- Increases protection from data theft and fraud for increased customer goodwill
- Saves money by eliminating the preparation and shipment of large volumes of paper
- Opens more opportunities for product portfolio penetration and fee-based services
- Helps keep sensitive customer data secure.

Integration with Rimage Hardware and Shipper Software

Financial institutions typically burn and mail hundreds of cash management CD-ROMs monthly to their customers. CD-ROM Plus is based on a parallel queue batch technology that affords maximum hardware resource utilization. This translates into getting more work done more quickly and with fewer resources.

CD-ROM Plus integrates with the top-of-the-line Rimage hardware for CD/DVD duplication and recording, and interoperates with Rimage's industry leading printers and associated label generation software.

For improved accuracy and reduced effort in the labeling and shipping process, CD-ROM Plus integrates with automated software provided by major shippers. Even complex customer distribution instructions can be supported. One CD-ROM to three customer locations? Three CD-ROMs each to a different customer location? CD-ROM Plus can help ensure the right distribution.

CD-ROM Plus Product Features

- Combines image-based account reconciliation processing (ARP) and demand deposit accounting (DDA) statements with links to check images
- Burns multiple copies of the same content and allows each copy to be sent to a unique address
- Automates workflow with in-line CD-ROM labeling
- Supports Rimage Producer hardware, CD printers and associated dynamic templates
- Comes ready for UPS mail integration

- Re-burns CD-ROMs on a per-account basis via resubmit workstation
- Integrates with CSC's industry leading Encryption and Virtual CD-ROM software
- Integrates with CSC's Archive or other archival systems
- Supports the same viewer as CheckVision Virtual CD-ROM software.

CSC fully understands the challenges that face your financial institution. With CD-ROM Plus, you can reduce the expense of delivering checks and other account information while securing your customer's data.
