CHECKVISION E-DATA DELIVERY

AT A GLANCE

Generate More Fee-Based Revenues

Lower Operating Expenses

Enhance Fraud and Customer Privacy Protection

Improve Customer Service, Trust and Goodwill

Streamline Operations and Improve Audit Control

Increase Customer Retention and Attract New Business

More Options for Commercial Account Delivery

CSC's CheckVision® e-Data Delivery application suite provides the latest vehicles for secure and flexible delivery of check images, statements, reports, lockbox and associated payment data to your retail banking and corporate customers. The suite includes CheckVision CD-ROM Plus, Lockbox CDROM and Virtual CD-ROM. Supporting modules include CheckVision Scheduler and Encryption, and the system also requires CheckVision Image Framework, CSC's proven high-volume architecture. Images can come from CheckVision Archive or third-party industry archives.

The CheckVision e-Data Delivery suite provides new delivery services for retail and corporate customers while reducing operating expenses and fraud exposure. Not only does CheckVision help to eliminate the preparation and shipment of large volumes of paper by replacing paper check returns and related IRD printing costs but it also has the potential to generate fee income.

Create new products easily to offer your commercial cash management customers. Retain existing business and attract new customers by providing e-Data Delivery's broad functionality and strong yet transparent data protection. The comprehensive cash management services in CheckVision e-Data Delivery include image ARP and controlled disbursement. For ease of use, CheckVision Image Delivery provides a common interface for systems used in the delivery and viewing of check images, allowing bank customers to mix and match delivery types as desired.

Features of CheckVision e-Data Delivery

- Comprehensive suite of Internet, CD-ROM, DVD and printed applications
- Integrated electronic delivery of transactions:
 - Checks
 - Wholesale & retail lockbox
 - X9.37 addendum data
 - Statements - Reports
- Forward presentment or receipt of images for clearing purposes
- Support for both centralized and distributed processing
- Expanded ability to support geographically distributed clients
- Support for all leading image capture platforms
- Open-capture interfaces
- Proven scalability
- Published retrieval APIs

CD-ROM Plus

CheckVision e-Data Delivery includes cost-effective delivery software for cash management via CD-ROMs and DVDs. CD-ROM Plus offers exceptional quality and operational efficiency to empower organizations to improve customer service. CSC automates the entire process — from data retrieval to labeling and shipping — thereby reducing effort and increasing accuracy.

Virtual CD-ROM

CheckVision Image Delivery includes Virtual CD-ROM, which allows banks to offer commercial accountholders a downloadable data bundle distributed across the Web. Virtual CD-ROM self-installs onto customer-provided local storage, and the data then interoperates with the cash management software available in CD-ROM Plus. Integrated daily updates through Virtual CD-ROM can even help accountholders approximate real-time cash management.

Lockbox CD-ROM

CheckVision Image Delivery includes imaging capabilities for all types of payments — including retail remittances, retail lockbox and wholesale lockbox. Banks can provide their customers with images of lockbox checks on CDROM, DVDs or online including dual sorting capabilities as well as the ability to search by invoice number, check number, dollar amount or other fields, and the options to view and print images from desktops.

Supporting Modules Enhance Cash Management

CheckVision Encryption — e-Data Delivery affords the highest levels of data security available in the industry today for safe delivery of financial data via the Internet or CD-ROMs and DVDs. CSC's just-in-time Encryption is unique; by employing a special customer key CD, decryption is transparent to the bank's customers when using image-viewing software day-to-day.

CheckVision Scheduler — This comprehensive scheduler lets you manage the delivery of the CheckVision e-Data Delivery products. The system includes an easy-to-use image viewer via a Windows Application or an Internet browser.

Integrated Payments Systems

CSC understands the challenges that face your financial institution. With CheckVision e-Data Delivery, you can offer more options for secure delivery of transaction images and other data to your corporate clients while you reduce operating expenses.

CSC's applications to automate payments processing throughout your operation include CheckVision Archive, CheckVision Image Delivery, and Remittance Processing. This comprehensive suite can be implemented as a single transaction system or as a stand-alone archive solution.
