

# ACCELERATE GHG COMPLIANCE/ CO<sub>2</sub> MANAGEMENT

With CSC's Carbon Managed Service for Non-U.S. Companies

**Want a fast track to Greenhouse Gas (GHG) and Carbon Management for all your plant sites?**

**Seeking a common foundation for managing your company's carbon footprint for carbon exchange provability requirements, product carbon content management, carbon financial reporting, and expansion of voluntary reporting standards?**

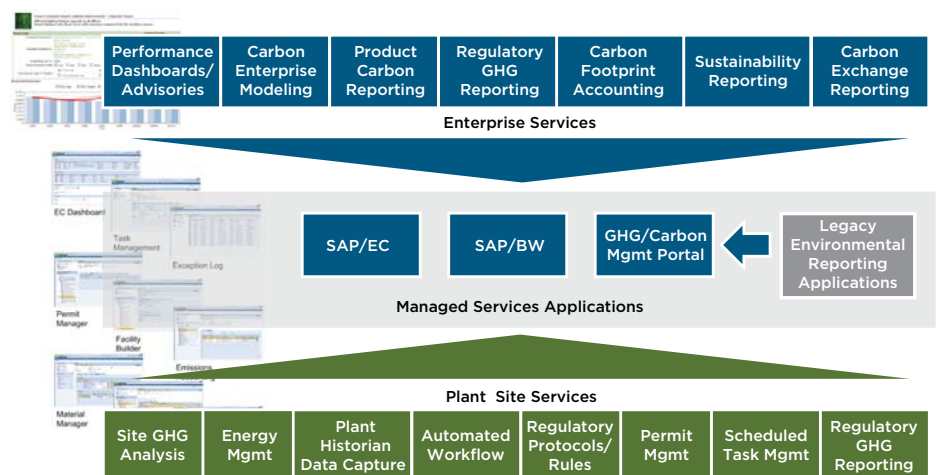

CSC's Accelerated GHG Compliance/Carbon Management — a managed service — offers your operations a single, Web-based application that allows your company to comply with regulatory and voluntary GHG/Carbon Management programs and provides enterprise management tools to meet business objectives, such as carbon reduction goals and energy savings.

CSC provides an accelerated start-up and implementation (spanning between four to six months, depending on the number of plant sites) of your SAP/EC/CI/BW environment that will enable your company to have a common, provable source of greenhouse gas emissions and carbon footprint to be used for product carbon content management, voluntary sustainability reporting, and carbon exchange compliance. We will also provide management dashboards for facility-level monitoring of carbon footprint performance against objectives. Delivered as a managed service, our program includes advisory services on a periodic basis to identify operating issues and help your company achieve its carbon footprint reduction goals. With CSC's accelerated approach, your existing reporting is integrated into a common Web portal so that your plant and regulatory personnel will have a unified set of management capabilities for reporting.

With Accelerated GHG Compliance/Carbon Management from CSC, you'll benefit from:

- Rapid start-up and implementation of GHG/carbon reporting delivered on demand, provide a single plant regulatory system for reporting GHG emissions, carbon footprint, and energy use
- A single common data source for company management of your carbon footprint and waste management reporting to ensure provability of reporting
- Informed management decisions about how your company will meet its carbon footprint and protect carbon credit revenue
- A common carbon footprint accounting foundation that prepares your company and establishes the groundwork for product carbon content scoring and labeling

## CSC GHG/Carbon Management Solution

# A RAPID GREENHOUSE GAS (GHG) ASSESSMENT AND PLAN

For Non-U.S. Companies

## About CSC

The mission of CSC is to be a global leader in providing technology-enabled business solutions and services.

With the broadest range of capabilities, CSC offers clients the solutions they need to manage complexity, focus on core businesses, collaborate with partners and clients, and improve operations.

CSC makes a special point of understanding its clients and provides experts with real-world experience to work with them. CSC is vendor-independent, delivering solutions that best meet each client's unique requirements.

For 50 years, clients in industries and governments worldwide have trusted CSC with their business process and information systems outsourcing, systems integration and consulting needs.

The company trades on the New York Stock Exchange under the symbol "CSC."

## Want to fast track your Greenhouse Gas reporting compliance and carbon management for financial advantage?

Now you can, by leveraging CSC's predefined maturity model, end-to-end business processes and reference architecture. With our proven "Minimum Essential" approach, you can determine the right level of sophistication and investment needed for both compliance and commercial advantage.

During an insightful three-day assessment, available at no cost to qualified companies\*, we will help you determine the relevance and impact of carbon exchange provability, voluntary sustainability reporting, carbon accounting, and product carbon content management capabilities. Our team will assess your current GHG/Carbon Management capabilities; provide guidance and management alignment on a future state vision, and help your company prepare a business case and roadmap for migrating to a future state set of capabilities using a combination of executive interviews and workshops with business, operations and regulatory management.

With a Rapid GHG Assessment and Plan from CSC, you'll:

- Learn about how new and changing greenhouse and carbon management regulations and commercial practices will impact your company over the next five years
- Map your company's current capabilities and aspirational vision for GHG Reporting and carbon management across processes, technologies, skills and organization, management and control systems, and values and beliefs
- Identify a financial/risk balanced approach to setting your development goals over the next two to three years based on our maturity models — reflecting a progression of best practices from internal focus to value chain integration
- Determine what systems capabilities will be needed in what time frame based on your company's regulatory compliance profile, future business opportunities, and current technology profile
- Establish a five-year development roadmap to achieve both compliance and business advantage

## Representative Workshop Roadmap Summary

Phases 0 and 1 — Regulatory GHG Reporting		Phase 2 — Carbon Financials		Phase 3 — Cap and Trade Preparation														
Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2									
2010				2011		2012												
<b>PHASE 0</b>		<b>PHASE 1</b>		<b>PHASE 2</b>			<b>PHASE 3</b>											
1. Scope 1 Data Repository	2. Documentation for Process and Procedures for Repository	3. PE Web Site with Standard Templates	4. Annual Regulatory GHG Reporting	5. SAP EC Carbon Impact Modules	6. SAP/EC Carbon Footprint Accounting	7. Site Carbon Dashboard	8. Quarterly GHG Reporting	9. Carbon Costing Trend Analysis	10. Carbon Exchange Modeling	11. CFO Corporate Carbon Dashboard	12.
