

## ARE YOU PROTECTED FROM TODAY'S THREATS?

### Counteract the risks

Round-the-clock network protection against downtime and disruption

### Secure electronic communications

### Cybersecurity process and management expertise

### Lower operational cost

### THE CHALLENGE

Email and web traffic, critical to ecommerce and other business processes, introduce risk in the form of malware and viruses.

Unprotected or vulnerable messaging infrastructures are regularly used by cybercriminals as part of elaborate plots that compromise customers, partners and employees not to mention increasing the costs of compliance with regulatory and industry standards.

Consequently, companies spend billions of dollars a year to secure their messaging infrastructures. Over time, the best mix of individual point solutions can leave gaps that are easily exploited by cybercriminals and malicious insiders.

The best defense is a good offense, but many companies don't have the expertise, resources or time to spend on securing the messaging infrastructure.

### THE SOLUTION

CSC CloudProtection for Mail and Web is an efficient and effective solution that delivers round-the-clock network protection from cyber threats and malicious attacks. Early detection enables quick recovery which lowers the cost and risk.

In fact, threats are blocked before they even reach your network. Web use is easily monitored and managed so that sensitive content can be identified and controlled.

As a pay-per-use service, CloudProtection eliminates the need to manage onsite security hardware and software and simplifies administration. Our security experts provide consistent, 24x7 security management and support.

### HOW IT WORKS

CSC CloudProtection for Mail and Web detects threats in email and web traffic. The technology integrates best-of-breed commercial scanners and proprietary technology to detect and protect against threats.

In addition to technology, we add decades of security and compliance experience. Our security experts configure the security policies you require, test the policy definitions and then quickly onboard CloudProtection.

CloudProtection automatically applies your defined policies, controls content, and scans for inappropriate images. This improves employee productivity and minimizes misuse of company resources.

This predictable service eliminates the need to manage hardware or software and does not require dedicated IT staffing. One administration portal displays your email and web security, reducing the costs of administration and management. Industry-leading service level agreements (SLAs) ensure a highly-available, effective, accurate service with 24x7 support from our security specialists.

## KEY FEATURES

CSC CloudProtection for Mail and Web is a flexible, highly configurable solution with comprehensive security features and SLAs:

### Email Security and Control

- **Anti-Virus:** Scans inbound and outbound email, attachments, macros, URL links or executables
- **Anti-Spam:** Protects unsolicited or unwanted email
- **Content Control:** Filters based on security policies
- **Image Control:** Detects inappropriate images in email

### Web Security and Control

- **Protection:** Routes web requests and attachments through spyware and virus services
- **URL Management:** Scans website URL's and enforces client policies

### Message Encryption

- **Message:** Provides an encrypted private email network with partner organizations
- **Policy Based:** Delivers encrypted emails based on client security policy

### Service Level Agreements

- 100% known and unknown email virus capture
- 99% spam capture rate
- 100% email delivery
- 100% service availability
- 100% known web virus protection

## KEY BENEFITS

CSC CloudProtection for Mail and Web provides valuable benefits:

- Confidence that your messaging infrastructure is secure
- Consistent round-the-clock expertise
- Lower overall operating costs
- Compliance with pre-defined internal policies, industry standards and regulatory guidelines reduce risk

## CSC – COMMITTED TO YOUR SUCCESS

With 50 years of system integration experience, we understand the enterprise. Customer-centric and platform independent, we help you select the best technology. Security is an integral component of all our offerings, processes and systems. Our high level of support helps you minimize risks.
