

CSC CloudMail™

FOR MICROSOFT EXCHANGE

A CSC TRUSTED CLOUD SOLUTION

MICROSOFT COLLABORATION HOSTED BY CSC

Lower your TCO for Microsoft collaboration applications

- Microsoft Exchange 2010, SharePoint 2010 and Lync
- High scalability, security and reliability
- Painless migration

Key Benefits

- Lower, predictable costs aligned with business need
- Anywhere, anytime access
- Simplified IT management
- Your choice of on- or off-premises deployment

THE CHALLENGE

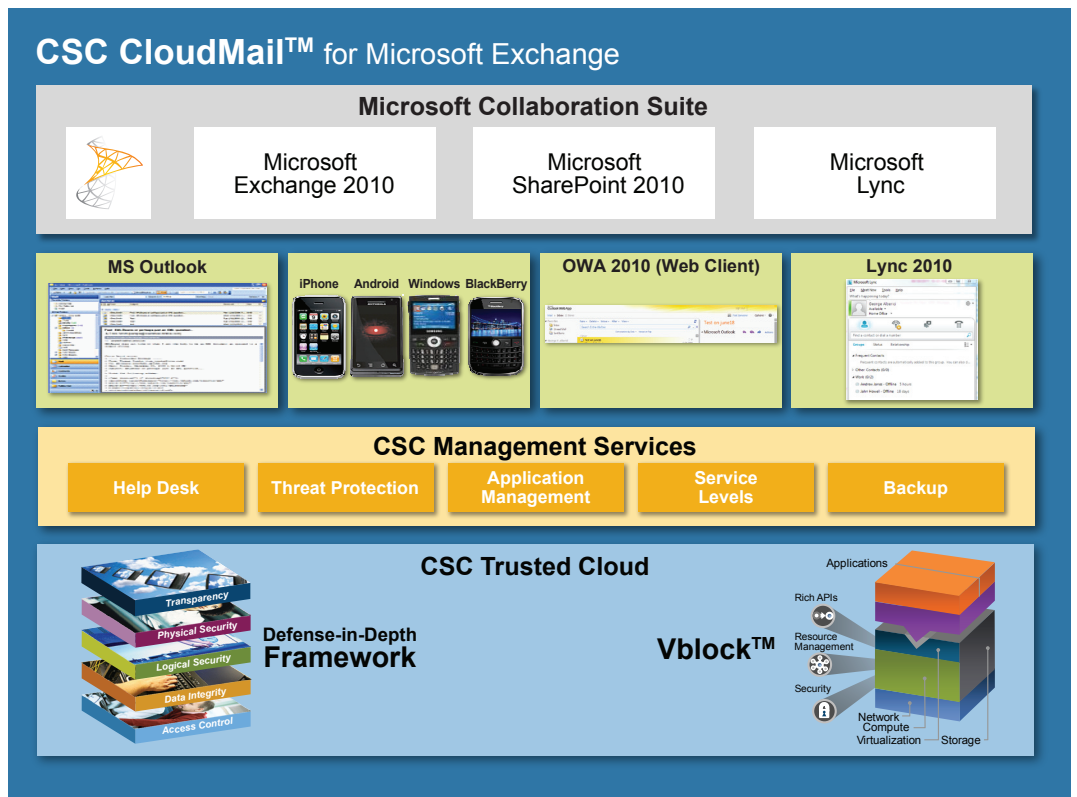

Because your business relies on email and collaboration, you require both the latest functionality to meet user needs and a highly available, resilient and secure infrastructure. But shrinking budgets and increasing workloads require that you seek out more cost-effective solutions — solutions that will reduce your total cost of operation, simplify management and allow your staff to refocus on the core business.

THE SOLUTION

CSC CloudMail for Microsoft Exchange offers an affordable and flexible alternative to self managing and hosting your email and collaboration applications. CloudMail for

Microsoft Exchange provides a scalable, reliable and consumption-based service with your choice of off-premises or on-premises deployment. Your users gain next-generation messaging and anywhere, anytime access to email, instant messaging, conferencing and document sharing.

CloudMail for Microsoft Exchange combines the Microsoft 2010 messaging and collaboration functionality of Exchange, SharePoint and Lync with CSC managed services and CSC Trusted Cloud data center deployment. It eliminates the expense of maintaining an in-house mail system and the staff burden of application management.

Scalable, reliable and secure enterprise messaging with on- or off-premises deployment

CSC — COMMITTED TO YOUR SUCCESS

With 52 years of system integration experience, we understand the enterprise. Customer-centric and platform independent, we help you select the best technology. Security is an integral component of all our offerings, processes and systems. Our high level of support helps you minimize risks.

Trusted_Cloud@csc.com

It is an ideal alternative if you are looking to upgrade and migrate to Microsoft Exchange 2010, lower your IT operational costs and gain the scalability that cloud delivers.

Functionality. Microsoft Exchange 2010 from CSC offers a consistent inbox, calendaring and contacts experience across internet browsers and mobile devices. The enhanced Outlook Web Application can be accessed from Firefox, Safari and Internet Explorer. Plus, enhancements to mobile access allow you to extend the productivity benefits of Microsoft Exchange to workers even when they're away from their PCs. With CSC CloudMail for Microsoft Exchange, larger mailbox options are available with seamless archiving.

With CSC CloudMail for Microsoft Exchange, you have the option to add SharePoint 2010 and Lync functionality as a service. SharePoint manages documents, records, Web content and rich media on a single platform. It provides the ability to manage and share documents from start to finish; develop, create and deploy websites quickly; and publish reports that enable better decision making.

Flexible Deployment. You can scale users up or down as required with off- or on-premises service deployment options and per-seat user pricing. Off premises, the solution is deployed from the CSC Trusted Cloud. On premises, it is deployed in a private cloud environment, so you can gain scalability, efficiency and cost savings while retaining some or all of your email applications onsite.

Security. When delivered on premises, CSC CloudMail for Microsoft Exchange is deployed behind your firewall using your security and compliance standards and processes. Off premises, the service is delivered from the CSC Trusted Cloud data centers. All are Tier II or III access controlled, fault-tolerant, SAS 70 Type II audited, and protected by CSC's holistic defense-in-depth security framework, which delivers the physical and logical security, access control, data integrity and transparency needed to address enterprise requirements.

Reliability. CloudMail for Microsoft Exchange provides messaging and collaboration with end-to-end management backed by 99.9% or 99.95% availability SLAs. Automated service monitoring, failover and data backup are included for both on- and off-premises deployment options.

WHAT'S INCLUDED

CSC CloudMail for Microsoft Exchange is a fully managed messaging and collaboration solution built on Microsoft Exchange 2010 with options for adding Microsoft SharePoint 2010 and Lync IM functions. The service includes the software, hardware infrastructure and ongoing support on a per-seat usage basis. No capital investment is required for on- or off-premises deployment.

SOFTWARE

The base solution includes the full functionality of Microsoft Exchange with support for Web and desktop clients and mobile devices.

CLOUD INFRASTRUCTURE

CSC's Trusted Cloud is built on the VCE Vblock™ platform, which combines leading technology from VMware, Cisco and EMC, as well as CSC's multidimensional defense-in-depth security and transparency framework, developed over more than 50 years of outsourcing experience.

MANAGEMENT SERVICES

This CSC CloudMail service provides onboarding and management services. Management services include application management, service levels, backup, threat protection and ongoing 24x7 help desk services.

OPTIONAL MIGRATION SERVICES

CSC migration services for Microsoft Exchange, IBM Lotus Notes and other email systems ensure a smooth migration and mitigate startup productivity risks.
