OF ENTERPRISE RISK AND EXPOSURE

CSC

AN INSURANCE OPTICS SOLUTION

SEE EVERY DIMENSION OF ENTERPRISE RISK AND EXPOSURE

AT A GLANCE

Gain Accurate Insight into Financial Risk Exposure

Refine and Potentially Reduce Financial Reserve Requirements

Support Regulatory and Compliance Demands

Access Enterprisewide Data Quickly and Reliably

Deliver Efficient, Auditable, Repeatable Processes to Measure Financial Risk

GET THE WHOLE PICTURE

Are you sure that you're accessing the highest quality data available for factoring your financial risk position? Unless your assessment takes into account all relevant data from your many insurance and financial systems, you're not getting the whole picture.

To properly assess enterprise financial risk, you need an integrated information infrastructure and the analytical capabilities required to understand critical risk factors. And information that helps you see your exposures more clearly is critical.

Financial Risk Intelligence, a combination of insurance-focused software and services from CSC and Towers Perrin, helps you see every dimension of financial risk and exposure across your enterprise. It's the first end-to-end insurance solution to manage data from source systems directly to financial modeling platforms.

FOCUS ON YOUR PERFORMANCE

Using CSC's insurance domain expertise and proprietary Insurance Industry Data Model, we ensure data quality by automating retrieval from across your enterprise — from systems that we know well. Your data is then processed using Towers Perrin's financial risk calculation and modeling software and analytical tools to create a highly accurate risk profile.

Financial Risk Intelligence can help you:

- Sustain accurate financial risk measurements through automated data provisioning
- Decrease data latency to increase the frequency and accuracy of financial risk calculations
- Deliver data transparency through an efficient, auditable, repeatable process
- Reduce cost with automated data aggregation, transformation and cleansing through a centralized data source
- Provide more real-time updates to your enterprise risk management assessments
- Provide access to an on-demand, enterprisewide data source for financial risk applications
- Refine your reserves and create opportunities to improve financial and operational performance
- Support current and emerging regulatory and compliance demands.

ENSURE DATA QUALITY IN A SINGLE ENTERPRISE REPOSITORY

Gathering accurate and timely data is your first challenge. CSC's Insurance Industry Data Model creates an enterprise data hub for consolidation of needed, key data from your systems.

We unify data across your organization's major functional and business areas and create an enterprise repository for financial risk analysis and reporting. Our approach ensures every piece of data is traceable to its source, and versions are tracked to document data integrity. Financial Risk Intelligence includes a ready-made financial risk analysis platform with predefined data marts and analytics capabilities to support timely risk and financial modeling calculations.

Our data integration process automates the extraction, transformation and loading of data from CSC systems and third-party sources such as general ledger systems.

TURN DATA INTO INSIGHT

The next step is calculating and modeling your data. Towers Perrin's powerful financial modeling platform meets your need for actuarial constituents to access a versioned, centralized data source for financial risk projections. Risk analysts from across your enterprise can access the data to group, compress and select model points for financial projections. This streamlined process allows for more frequent reporting and proactive financial management of changing market conditions.

Financial Risk Intelligence will sharpen your focus on key performance indicators for financial risk management and other criteria. You'll see the answers unfold before you in visual reports that reveal the many facets of your enterprise financial risk and exposure.

To learn more about Financial Risk Intelligence or to schedule an assessment, call 800.345.7672 or send an e-mail to inforequests@csc.com.

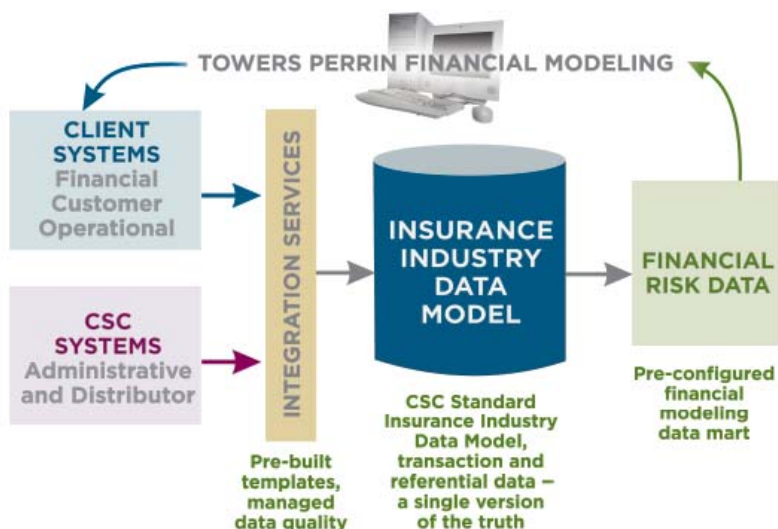

CSC'S PARTNER Towers Perrin

Financial Risk Intelligence draws upon the financial risk calculations and management expertise of global professional services firm Towers Perrin.

AN INSURANCE OPTICS SOLUTION

CSC's Insurance Optics™ is a suite of software and consulting services that support business intelligence and enterprise financial risk analysis.

Insurance Optics solutions include Business Analytics, Financial Risk Intelligence, and Business Intelligence consulting services to help insurers gain insight from data, drive change and manage financial risk and exposure.

Financial Risk Intelligence ensures quality data and uses advanced, industry-focused financial modeling to show every dimension of your enterprise financial risk and exposure.

ABOUT CSC

The mission of CSC is to be a global leader in providing technology-enabled business solutions and services.

With the broadest range of capabilities, CSC offers clients the solutions they need to manage complexity, focus on core businesses, collaborate with partners and clients, and improve operations.

CSC makes a special point of understanding its clients and provides experts with real-world experience to work with them. CSC is vendor-independent, delivering solutions that best meet each client's unique requirements.

For more than 45 years, clients in industries and governments worldwide have trusted CSC with their business process and information systems outsourcing, systems integration and consulting needs.

The company trades on the New York Stock Exchange under the symbol "CSC."

ABOUT CSC IN FINANCIAL SERVICES

CSC provides mission-critical business solutions, consulting and outsourcing services to leading financial services firms around the world.

We bring more choices to the industry. We help clients plan for business and technology change. We create software, tools and processes to address specific business needs, and we continually enhance those solutions by collaborating with an extensive network of client communities and technology partners.

Our global outsourcing operations give us real-world insight into business and IT processes that deliver the best results for our clients. More than 1,200 major banks, insurers, and investment management and securities firms rely on the experience, ingenuity and leadership of more than 10,000 CSC employees focused on financial services.
