

Are you struggling with

- Production bottlenecks
- Supply constraints
- Escalating costs
- Safety issues
- Environmental controls
- Information silos

Changing Times Demand Flexibility, Endurance and a Smart Approach

The recent energy boom that prompted mining startups, expansions and mergers has been tempered by the global economic crisis. Quickly shifting from expansion and growth to critical cost control and operational efficiencies as the global economy corrects itself, has resulted in significant operational and financial issues. Finding a solution that can quickly get your business back on track, while positioning for sustainable growth, is a smart approach to achieving short- and long-term success.

CSC's SmartStart SAP Solution for the Mining Industry is a rapidly integrated, preconfigured enterprise resource planning solution leveraging SAP's suite of products. Aligned with industry support strategies and best practices, our SmartStart solution is optimized for small to medium enterprises and startup mining organizations looking to manage costs, grow profitability, coordinate supply chain processes and enhance customer relationships.

We engage proven processes and mining tools to manage mining operations to both short- and long-term strategic perspectives while improving output quality, organizational responsiveness, cost competitiveness and global presence. Additional internal cost and maintenance reductions are the benefits of this single platform solution.

SmartStart Strategic Areas of Focus:

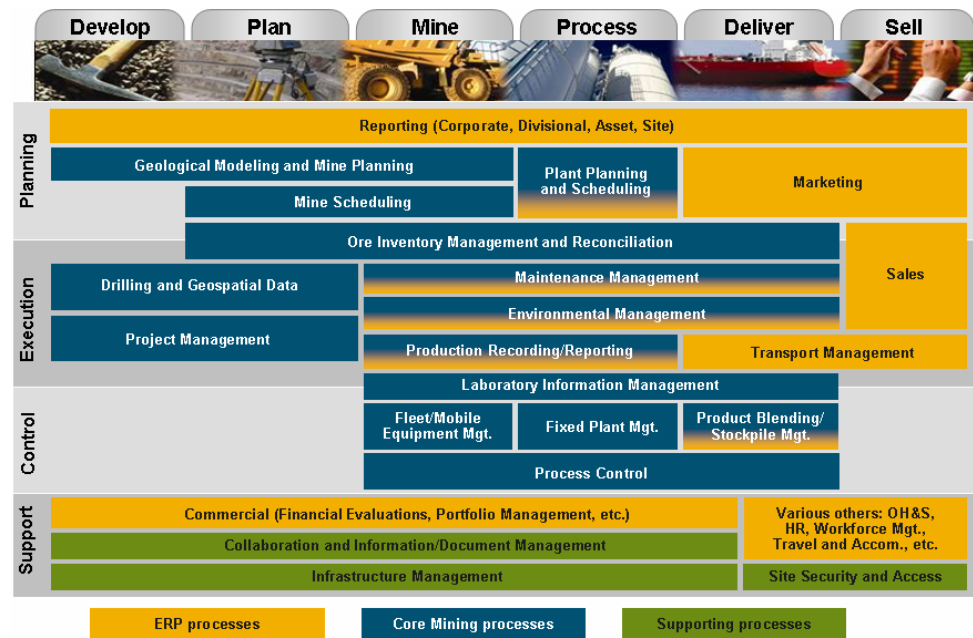

We have identified seven areas of focus for new solutions targeted at small-to-medium enterprise (SME) and large enterprise (LE) mining companies:

- SAP for mining rapid deployment
- Mincom conversion
- Capital project enablement
- Lifecycle asset management
- Remote operations and automation
- Mobile and wireless
- Workforce management

Our consultants, project managers and applications specialists also have experience across the whole range of typical mining systems and processes, covering three different classes of solutions:

- ERP processes and systems (SAP and Mincom mainly)
- Core mining processes and systems (many niche mining vendors)
- Supporting processes and systems (Information management, ITIL tools, etc.)

CSC has Domain Experience Across the Mining Value Chain

About CSC

The mission of CSC is to be a global leader in providing technology enabled business solutions and services.

With the broadest range of capabilities, CSC offers clients the solutions they need to manage complexity, focus on core businesses, collaborate with partners and clients, and improve operations.

CSC makes a special point of understanding its clients and provides experts with real-world experience to work with them. CSC is vendor-independent, delivering solutions that best meet each client's unique requirements.

For 50 years, clients in industries and governments worldwide have trusted CSC with their business process and information systems outsourcing, systems integration and consulting needs.

The company trades on the New York Stock Exchange under the symbol "CSC."

We recognize the business challenges you face and we have the ability to provide successful outcomes:

- We are an experienced systems integration partner, specializing in SAP implementation
- Your new site development goes faster with fewer hassles by using a simple SAP solution that can be scaled up as the business grows
- You can convert from Mincom to SAP more easily by leveraging our experience in both technologies
- Your complex requirements, including integration of a variety of core mining systems, are possible using our proven solution designs
- Our global sourcing capabilities blend a local, regional and offshore team's capabilities to offer seamless, flexible resourcing and delivery at a reasonable cost

Successful transformation is only possible with a partner that is aligned to your business needs and that has comprehensive industry knowledge:

- We have developed our domain expertise through many installations and transformations
- We have acquired people with expertise in both mining and exploration
- Our SAP experience enables us to develop solutions to the complex business problems in mining
- With expertise in centers around the world, we can deliver services 24x7
- Our company strategy supports investment in the Natural Resources sector, enabling smart responses to the changing dynamics of the industry
- Our Lifecycle Transformation Approach provides emphasis on both process redesign and organizational change

You can learn to take advantage of mining industry best practices by employing CSC's SmartStart SAP solution. Please contact Rich Sernyak at 443.831.4763 | rsernyak@csc.com or Alan Krivanek at 520.906.4010 | akrivanek@csc.com.

As a global SAP partner we have 4,500 staff qualified in the support of SAP systems located across America, Europe and Asia Pacific We deliver complex SAP solutions to some of the world's largest global mining and exploration companies.

With more than 10 years experience serving mining clients, we have developed SAP solutions that meet the complex business requirements of those clients.

We have also invested in a focused industry research function; our Natural Resources Center of Excellence provides insights in to the future trends and drivers that will shape the way this industry does business.
