

You have real-world challenges. We provide real-world solutions. Your mission success is the primary measure of our success. Teaming with you, CSC supports practical solution development for the daily challenges that arise in your mission-critical environments.

Training and Range Support Services

Operating in an open-system netcentric world demands more collaborative training environment solutions. End-user readiness and human performance improvement are significantly enhanced by the balanced application of live, virtual, and constructive training solutions and services. Whether it's increasing the proficiency of America's military or keeping workers current in the face of government transformation, effective training is fundamental to meeting mission requirements.

Today's mission and range commands provide real-world environments whether on land, in the sea, air, or space to support multiple, concurrent missions. These missions include research, development, test and evaluation requirements, and operational performance assessments for U.S. and international clients.

CSC performance capabilities match these client needs. We respond to unique program requirements that might include:

- Information Technology
- Training Analysis, Design, and Development
- Training Services
- Simulation Systems Support
- Engineering Services
- Performance Assessment
- Engineering, Instrumentation
- Data Collection and Management
- Target Handling
- Training and Simulation
- Logistics
- Aviation Support, Airfield Management
- Environmental Support

How CSC Can Help

By matching the most capable and experienced managers with the appropriate program and giving those managers the authority to do what is needed, we consistently exceed customer expectations.

Because our managers share knowledge across similar programs, they can apply best commercial practices and other lessons learned to raise performance standards at all client sites. CSC consistently applies:

- ISO 9001:2008
- Six Sigma
- High Performance Work Teams and other standards and tools to ensure efficiency and effectiveness.

As one of the first ISO 9001:2000 certified custom training product organizations in the world, we can be counted on to develop innovative solutions that maximize human performance.

Representative Clients

Our mission and range customers include:

- U.S. Army, White Sands Missile Range

- U.S. Navy, NAWCAD Patuxent River, O&M Support Services for the Atlantic Range and Facilities Department and the Test Article Preparation Department
- U.S. Army, Flight School XXI

Applied Technology Group

In this time of high-performance expectations combined with ever-shrinking budgets, we bring practical, experience-driven solutions. We excel at operating in

dynamic environments providing responsive and flexible management with the correct skills to execute missions. Our systems

integration background enables us to deploy the best mission-tailored solution, powered by technologies that provide real-time decision-making capability. Why does this matter? Because the right solution properly and efficiently implemented enhances performance and lowers cost.

Our most-valued assets are our people. They have the experience to deliver the results our clients require. Headquartered in Fort Worth, Texas, ATG employs approximately 13,842 personnel in more than 42 worldwide locations. ATG is part of the CSC North American Public Sector and specializes in:

- Space and Aviation Services
- Infrastructure Services
- Training and Range Support Services
