

## Healthcare Solutions Management/Reporting

### AT A GLANCE

Healthcare Risk Management

Liability Management

Incident/Occurrences System

Workers' Compensation Management

Policy Management

Vehicle Accidents Management

Advanced, Easy-to-Use Reporting

### Incident/Occurrence, Professional Liability, Workers' Compensation

CSC's RISKMASTER® healthcare risk management solution is installed in over 500 sites, including multi-hospital systems, teaching facilities, university health systems, managed care organizations, rehabilitation centers, and ambulatory care centers. RISKMASTER supports in-patient and out-patient reporting requirements. RISKMASTER software also features automated patient, employee and physician interfaces.

RISKMASTER is tailored to each organization's specific operations. The primary base components for healthcare include Liability, Incident/Occurrences, Workers' Compensation and Policy Management, and Vehicle Accidents. Specialized features help support OSHA, Joint Commission on Accreditation of Healthcare Organizations (JCAHO) Sentinel Event reporting, MedWatch, patient/physician files, employee health, bill review, and infectious/nuclear waste tracking.

RISKMASTER addresses healthcare-specific data needs for managing medication occurrences, exposures, needle sticks, falls, adverse drug reactions, generic screening, safety, and more. Optional files can be set up for respirator fit testing, environmental life safety issues, home health product/equipment recalls, and fire drill participation. The Incident/Occurrence System supports the event-to-claim process as well as MedWatch requirements. Online event reporting is accessible from each nurse's workstation through a browser and is centrally operated and maintained.

RISKMASTER offers reporting capabilities unmatched in the healthcare industry. Non-technical users can quickly and easily create reports by simply selecting the data fields needed for the report. The information is returned real-time and includes data entered up to the time the report is run. The reporting tool contains drill-down features and easy graphing/charting capabilities.

### Benefits

- Automatic event-to-claim data integration
- Patient, visitor, employee, and witness data
- Patient, employee health information download options

- Trending and profile reporting and graphics
- Derived data field options
- Diary management and best practices
- Severity level trending
- Customizable screens and quick entry
- Dynamic user defined field update
- 100+ standard reports library
- Benchmarking data options
- Integrated help and online documentation
- Drag-and-drop report and graph/chart creation

RISKMASTER captures the critical healthcare data you need to manage and analyze your claims fast and effectively. It dynamically develops claim screens based on your custom data, and its Quick Entry System provides a wizard to help you create a custom screen for processing the data you use most often.
