

What and Why

CSC's Application Portfolio Management Service assesses the alignment of the portfolio with business direction, looking to optimize the clients spend and performance whilst minimising risk. APM builds portfolio Roadmaps to guide the portfolio direction in step with that of the business.

CSC's Portfolio Optimisation Service delivers strategic and tactical improvements to your application and IT estate based upon recommendations from the APM service. CSC offers a full lifecycle of services covering all aspects of application management through modernisation, migration and replacement.

Business Value

- Optimizing business investment
- The optimized portfolio aligns business need, cost, performance, and technology solution mix in the most efficient way for the clients' business strategy.
- Assists in the continual alignment of business strategy to IT execution
