

LEVERAGE SOA IN YOUR ERP ENVIRONMENT

“We need help **transforming** our business and application portfolio to ensure alignment of the technology with our business objectives.”

Why SOAsure?

SOAsure is CSC’s proven end-to-end approach to creating a service-oriented architecture that enables your enterprise to respond rapidly to market changes with new products and services. Consisting of a set of seven services that address the entire SOA lifecycle, SOAsure uses proven tools, processes, methodologies, and accelerators to assure cost-effective development, maintenance, and support. SOAsure also offers a variety of entry points. So wherever you are in the process of considering or implementing SOA, you can be confident that SOAsure services are aligned with the needs of your unique business environment. That’s why we call it SOAsure.

SOAsure Enterprise Resource Planning (ERP) Services responds to the needs of companies that are moving towards a business-driven service-oriented architecture (SOA) and wish to configure their ERP environments to best leverage the benefits offered by SOA.

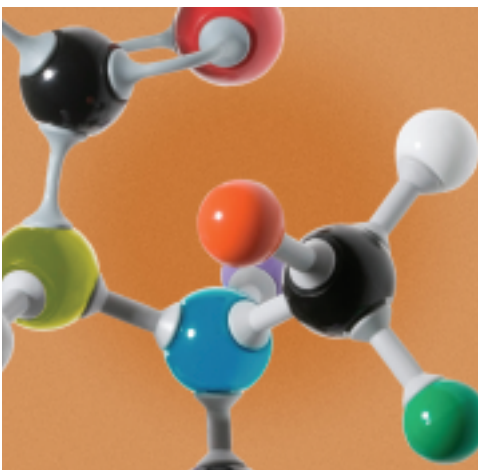

As many companies experience accelerating growth and change, their ERP packages have become more and more complex and difficult to manage. Mergers and acquisitions, globalization, and product direction

At the same time, major ERP vendors are investing heavily in SOA (i.e., Oracle Fusion and SAP Netweaver) as a core component of their products and are encouraging customers to embrace and to implement SOA projects that drive business value.

How SOAsure ERP Transforms Your ERP Environment

If your goal is to align your ERP environment with your business strategies, as well as maximize ERP and SOA synergies and establish a roadmap for future SOA development, CSC SOAsure ERP services can enable you to:

- Distribute information to all parts of the business easily and rapidly
- Hide differences in platform, software architecture, and network protocols
- Assure delivery of information, even when systems and networks go off-line
- Reroute, log, and enrich information under central control without rewriting applications
- Deploy solutions incrementally, project by project, to better manage expenses
- Support message, service and event-oriented architecture
- Improve system security, scalability, availability, and robustness
- Improve auditability and reduce Sarbanes-Oxley compliance cost

of ERP vendors have placed many enterprises in the costly position of having to support multiple ERPs, multiple instances of the same ERP, or a combination of both.

Even for companies with a single, global ERP platform, there can be business complexities that require an ERP to be modified or extended.

The Entire Family of SOAsure Services

- Consultative Services
- Enablement Centers
- Accelerated Business Transformation
- Business-Driven Modernization

Fluent Oracle and SAP Spoken Here

CSC has global alliance partnerships with the two leading Enterprise Resource Planning (ERP) providers — Oracle and SAP. CSC has completed more than 800 projects for Oracle clients and manages over 220,000 *Oracle User Licenses* for clients through outsourcing arrangements.

CSC's Global SAP practice, with over 3,900 dedicated SAP consultants in 23 countries, has successfully completed more than 1,500 SAP implementations worldwide.

CASE STUDY

Move.com offers real estate services and relocation services via the Internet. The company wanted a centralized customer management repository to provide consistent customer contact and organization information, as well as self-service listing management and order capture. CSC employed an Oracle Customer Data Hub, and Oracle Fusion to provide the SOA-based integration between CDH, Siebel 7.8 CRM and PeopleSoft 8.9 (for HR and Financials).

Move.com has successfully deployed this solution for two of its business units and is preparing to roll out the solution to additional business units.

A Full Range of Transformative Services

CSC's approach to SOA ERP is business-driven, industry-specific and vendor-agnostic. Our SOA ERP service offering features a portfolio of services to aid in the implementation of — or evolution to — an ERP environment that is SOA-based. These services include:

- SOA ERP integration
- ERP upgrades to SOA-compliant versions
- ERP extensions migration to SOA
- Process orchestration spanning intra- and extra-ERP services
- ERP instance rationalization
- Migration to or integration with SaaS ERP services
- Virtualization of ERP environment platform
- Application management of SOA-ERP environment

Additionally, we can leverage a SOA Foundation enabled by ERP vendor platform-specific implementations (e.g., SAP Netweaver) for maximum interoperability in ERP environments.

Transforming your business begins with aligning your IT assets with your business strategies. Count on CSC for ERP Transformation Services that lead directly to new operating efficiencies, accelerated market responsiveness, and improved business results.
